🤝 Team Working Agreement & Rules

> **Our Mission:** To build a software solution that addresses a real-world problem while making strong, well-reasoned engineering choices.

Core Values & Guiding Principles

To ensure a healthy and productive environment, our team commits to upholding the following values:

- **Kindness & Respect:** Always be kind to one another and foster a supportive group dynamic.
- **Open Communication:** Keep channels open, transparent, and responsive.
- **Collaboration:** Bridge the gap between our different skill sets and work together as a unified front.
- **Efficient & Quality Work:** Maintain a high standard for our code and artifacts while respecting everyone's time.

Team Goals & Outcomes

We are highly motivated to achieve the following milestones together:

- [ ] Cultivate great team chemistry and a positive working environment.
- [ ] Deliver a fully functional, high-quality software solution.
- [ ] Learn from one another and successfully navigate the software engineering process.

Strengths & Unique Skills

Our team brings a diverse and powerful set of skills to the table:

- **Technical Versatility:** We have a strong mix of Front-end (HTML) and Back-end coding backgrounds.
- **Hackathon Experience:** Several members have proven abilities to build, collaborate, and ideate quickly under pressure.
- **Leadership:** Itai brings valuable project leadership and coordination skills from past hackathon experiences.

Challenges & Mitigation Strategies

We recognize that there are levels to building software, and every team has areas for improvement. Here is how we will address our identified risks:

Identified Challenge	How We Will Address It
No prior experience writing Markdown	We will experience a transformation together, learning the syntax as a group and helping each other format our documentation.
Scheduling conflicts and limited meeting times	We will prioritize proactive communication and heavily utilize asynchronous updates to keep the project moving.

Mutual Expectations

To succeed and reach our milestones, this is exactly what we require from one another:

- **Consistent Effort & Passion:** Bring your best energy and commitment to the project.
- **Schedule Transparency:** Openly discuss your individual availability and highlight any risks regarding time commitments or resource management early on.
- **A Safe Space:** Support one another so everyone feels comfortable sharing ideas, asking questions, and making mistakes.
